

Protect your bottom dollar from the chill of winter!

Get your warehouse ready with...

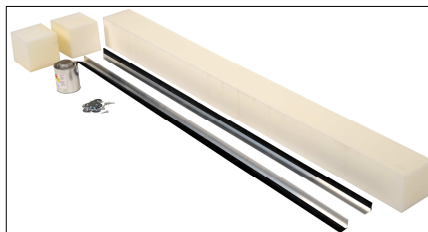

Dock Seals & Shelters

Trailers back up against **Dock Seals & Shelters**, compressing the pads and forming an effective seal. This seal cuts energy costs and protects merchandise from wind, rain, snow, dust, and fumes.

Dock Leveler Blanket

The **Dock Leveler Blanket** improves efficiency by helping you use less energy. The blanket will pay for itself quickly by controlling heat loss during the cold winter months.

Weather Stripping for Dock Levelers & Overhead Doors

Gaps around dock levelers provide a means for air infiltration and pests. **Weather Stripping** provides an effective means to seal these trouble areas, preventing heat loss and keeping pests out.

Infiltration Pads

Designed for blocking drafts between dock seals and dock levelers, the compressible foam **Infiltration Pads** provide a seal in all types of irregular gaps. A heavy weighted base provides this sealing action.
